

InnTrackPro – Hospitality Talent Management System

(powered by SnapHire)

HIGHLIGHTS:

Fully secure award-winning talent management system (similar in functionality to any leading Applicant Tracking System such as Taleo, First Advantage, etc.) but fully customized for the hospitality industry and your own company's specific needs.

Customized specifically for your business that lets you find, hire and retain the best people for your organization, and take control of your own recruitment. InnTrackPro help you reduce administrative effort, slash time to hire, reduce advertising costs, guarantee robust recruitment processes, operate volume hiring pipelines and hire people directly from your own talent pool.

A complete solution for your Human Resources Department – Handling every stage in the recruitment process from managing incoming resumes to the final stage (hire, decline, save for later) to generating all necessary compliance reports (such as EOE, OFCCP, Audit)

There's no hardware or software to buy, and implementation is fast and easy. As long as you have access to a web browser, you and your recruiters, HR advisers, managers, employees, candidates and even external agencies, have the entire infrastructure needed to use InnTrackPro.

Fully integrates with your company's website to power your Careers section matching the look and feel of your brand. The involvement needed from your IT team may be as little as creating a link to the new careers site from your existing web site. In addition, you can take control of the content so you can make changes immediately to add such things as employee testimonials, etc.

Allows you to easily cross-post job postings to various other employment websites such as Hcareers, Monster, Careerbuilder to increase the number of applicants applying for your open positions.

There are no upgrade fees, no training or support costs, and no separately priced modules. The entire service is included for a single, fixed fee. So if you decide to offer an employee referral program next week, there's no need to start thinking about contracts and procurement processes - you're ready to go. (And you will have the support to get this up and running).

And with major Banks, financial institutes and secure government departments all using SnapHire to power their recruitment, you can rest assured that your system is utterly secure and reliable.
